

METROPOLITAN ST. LOUIS SEWER DISTRICT

Public I&I Reduction

The Metropolitan St. Louis Sewer District Public I&I Reduction project includes the acquisition, construction, improvement, and equipping of the sewer district's wastewater collection system. To reduce inflow and infiltration, this project will consist of the rehabilitation of the existing collection system, including sanitary sewers and manholes, using various methods, including cured in place pipe (CIPP).

A Clean Water State Revolving Fund (CWSRF) loan in the amount of \$75.5 million and a CWSRF loan in the amount of \$20 million will be used to fund the continuation of the project for its next two phases.

The project is necessary to continue work on reducing the flow of groundwater and stormwater into the collection system and protect the waters of the state.

For additional information, please contact Mr. Bart Hager, P.E., Senior Civil Engineer, at the Metropolitan St. Louis Sewer District, telephone (314) 768-6208.

**This project funding is administered by the
Missouri Clean Water State Revolving Fund.**

**Project Cost: \$95,500,000
Completion Fall 2028**

This project funded wholly or in part by the Missouri Department of Natural Resources and the U.S. Environmental Protection Agency.
